WORK EXPERIENCE

Freelance/ web developer 2024
I have complete projects

Link building/web

- Developed and designed a link-building service website with a modern and responsive user interface. with Wordpress

House Removals/web

- Built a house removal service website to help customers easily explore services and contact the business online. Worked with Wordpress

Internship, Exeonic 2025 Jan – Mar 2025

- Worked with senior developers to learn full-stack development and improve application functionality.
- Participated in testing applications, fixing bugs, and improving overall app performance.
- Collaborated with the development team to complete tasks and deliver projects on time.

Exeonic/ Full Stack web & Mobile Developer Aril 2025 – Present

- Worked as a Full-Stack Developer building scalable web and mobile applications using modern development technologies.
- Developed mobile applications that worked smoothly on different devices and were easy for users to understand and use.
- Worked closely with designers and other developers to make sure projects were completed properly and delivered on time.
- Found and fixed bugs in applications and improved speed, performance, and overall user experience across multiple devices
- Added important features such as APIs, user login systems, and real-time updates to improve application functionality.

PROJECTS

Musjid Finder

AT/Exeonic

Mobile App/ Expo

- I have made this app individually as a full-stack developer
- Designed and implemented user-friendly interfaces for smooth navigation and accessibility
- .Managed the complete development process independently, including UI design, functionality, and testing.

Kegel exercises

AT/Exeonic

Mobile App/ Expo

- Worked with the team as a Full-Stack Developer on a Kegel Exercises mobile application
- Focused mainly on UI design, feature functionality, and improving user experience.
- Contributed to building responsive and interactive app screens..

Web Applications

AT/Exeonic & Personal

Web App | Next.js / React.js

- Worked as a Full-Stack Developer on multiple web applications at Exeonic and personal projects.
- Developed responsive user interfaces and implemented application functionality using Next.js and React.js.
- Contributed to both frontend and backend development while focusing on performance, usability, and clean code practices.
